

PNP & NP SEALED PUSHBUTTON SWITCHES

The Ideal Switch Solution for Enduring Harsh Environments

The PNP & NP series IP68 sealed pushbutton switches from C&K are engineered to meet the needs of applications for harsh environments – such as industrial, off-road, heavy equipment and lift products – where the switches are used repeatedly and are exposed to dust, water or other typically damaging elements. C&K's PNP & NP switches are IP68 sealed and RoHS compliant, feature a long lifecycle (1,000,000 uses) and are available in a variety of housing styles with up to a 5A resistive load.

Key Features

- Resistive load up to 5A
- 1,000,000 Cycles
- IP68 Sealed
- RoHS Compliant

Key Benefits

- Flexibility of integration into your design
- Longer Lasting Switches, reduces need for replacement and downtime of end product
- Endure Harsh Environments
- Use in Global Applications

Key Applications

- Control Grips
- Industrial Instruments
- Heavy Equipment
- Lifts
