Committed to excellence

Consult – Know-how. Built-in.
The Technical Competence from RUTRONIK
 Worldwide and individual consulting on the spot by competent sales staff, application engineers & product specialists.

Components – Variety. Built-in.
The Product Portfolio from RUTRONIK
 Wide product range of semiconductors, passive and electromechanical components, displays & monitors, boards & systems, storage and wireless technologies for optimum coverage of your needs.

Logistics – Reliability. Built-in.
The Delivery Service from RUTRONIK
 Innovative and flexible solutions: from supply chain management to individual logistics systems.

Quality – Security. Built-in.
Quality without Compromise from RUTRONIK
 The integrated management system (IMS) encompasses quality control, information security, environmental protection, occupational health and safety.

Everyday Genius at the Edge

MTK Genio SoC combined with an **open standards software platform** helps you design and create intelligent connected devices

MediaTek Genio™

MediaTek's Genio family of System-on-Chips (SoCs) empowers a diverse range of next-generation IoT devices. From smart home appliances and industrial automation to connected healthcare, Genio SoCs offer a compelling combination of features:

Multicore CPUs	High-performance Arm® Cortex®-A processors deliver the performance needed for demanding tasks
Integrated GPUs	Seamless rendering of graphics enhances user experience and supports advanced functionalities without compromising performance
Dedicated AI Processing Units (APUs)	Efficiently handles complex AI workloads, enabling features like facial recognition and voice commands
Robust Connectivity	Reliable 5G/Wi-Fi 6/Wi-Fi 6E/Bluetooth connectivity ensures devices stay online and responsive
Long-Lasting Battery Life	Genio SoCs dynamically switch between high-performance cores for demanding tasks and energy-efficient cores for background activities, reducing power consumption
10-Year Longevity Support	MediaTek offers a comprehensive 10-year longevity program for Genio SoCs, encompassing both silicon and software support. This commitment guarantees sustained availability and ongoing assistance for applications demanding extended lifecycles, particularly in industrial and healthcare settings.

*Pin compatible

MediaTek Genio 350 EVK

Key Features

- 3GB of LPDDR4X
- 64GB eMMC onboard
- Wi-Fi 5 2x2 wireless connectivity
- 2x MIPI CSI connectors with 1.3MP cameras
- 2x USB 2.0 ports
- 1x Micro SD card slot
- 1x HDMI Tx port
- 1x RJ45 Fast Ethernet
- 40-pin GPIO
- A 7-inch Full HD LCM touch panel

MediaTek Genio 700 EVK

Key Features

- 8GB of LPDDR4X
- 64GB eMMC onboard
- Wi-Fi 6 (2x2) + BT5.2 wireless connectivity
- 2x MIPI CSI connectors with 13MP and 8MP cameras
- 2x USB 2.0 ports
- 1x Micro SD card slot
- 1x HDMI Tx port
- 1x RJ45 Fast Ethernet
- 40-pin GPIO
- A 7-inch Full HD LCM touch panel

MediaTek Genio 510 EVK

Key Features

- 4GB of LPDDR4x
- 64GB eMMC onboard
- Wi-Fi 6 (2x2) + BT5.2 wireless connectivity
- 2x MIPI CSI connectors with 13MP and 8MP cameras
- 2x USB 2.0 ports
- 1x Micro SD card slot
- 1x HDMI Tx port
- 1x RJ45 Fast Ethernet
- 40-pin GPIO
- A 7-inch Full HD LCM touch panel

MediaTek Genio 1200 EVK

Key Features

- 8GB of LPDDR4X
- 64GB eMMC5.1 onboard
- Wi-Fi 6 (2x2) + BT5.2 wireless connectivity
- 2x MIPI CSI camera board with camera modules
- 2x USB 3.2 ports, 1x Micro USB OTG, 1x USB Type-C connector support DP
- 1x Micro SD card connector
- 2x HDMI port (IN x1, OUT x1), 1x eDP connector
- 1x LVDS connector
- 1x 10/100/1000M Ethernet RJ-45 connector
- 40-Pin GPIO
- A 7-inch full HD LCM touch panel

MediaTek Genio 1200

RSB-3810 & EPC-R3810

Edge AI Single Board Computer and Box

- 2.5" Pico-ITX single board computer
- 8GB LPDDR4X, 32GB eMMC
- Dual GbE, 1x 4-wire RS-232/422/485, 6 rear I/O configurations
- Android, Yocto Linux, Ubuntu

I-Pi SMARC 1200

Edge AI Development Kit Package

- Standard SMARC module plus carrier
- 4GB LPDDR4X, 64 GB UFS
- Dual GbE, CAN bus, 3x MIPI-CSI
- Yocto Linux, Ubuntu

3.5"-SBC-i1200

Rich I/O Extension

- 3.5" single board computer
- 4/8GB LPDDR4X, 32GB eMMC
- 4x COM, 1x UART, 8x DIO, 1x I/O extension socket (eDP, HDMI, I2C, UART)
- Android, Yocto Linux

MediaTek Genio 1200

SOM-7000

Ready for Edge AI Applications

- Standard SMARC with carrier
- 4GB LPDDR4, 16GB eMMC
- Dual-MIPI display and dual MIPI CSI-2 camera, flexible I/O configuration
- Android, Yocto Linux

MediaTek Genio 700

SOM-SMARC-Genio700

- Standard SMARC with carrier
- Up to 8GB LPDDR4X, up to 64GB eMMC
- 2x GbE, 1x CAN, 4x UART, TPM integrated
- Android, Yocto Linux

SOM-5000

- Standard SMARC with carrier
- 2GB LPDDR4X, 16GB eMMC
- 1x I/O expansion pin-header (supports GPIO x 40), 1x UART connector 1x M.2 slot, 1x Nano SIM card slot
- Android, Yocto Linux, Ubuntu

MediaTek Genio 510

SOM-SMARC-Genio510

- Standard SMARC with carrier
- Up to 8GB LPDDR4X, up to 64GB eMMC
- 2x GbE, 1x CAN, 4x UART, TPM integrated
- Android, Yocto Linux

MediaTek Genio 350

VAB-3000

- 3.5" single board computer
- 1/2/4GB LPDDR4, 16GB eMMC
- Optional carrier board with rich I/O feature set
- Android, Yocto Linux

MediaTek simplifies development by offering a single SDK for all SoCs. This single platform eliminates the need for developers to learn and manage multiple, individual SDKs, significantly reducing development time and complexity.

The streamlined process allows for shorter development cycles and simplified codebases. Additionally, the unified SDK enhances code portability, allowing applications to be deployed on multiple Genio SoCs. This enables wider application compatibility and facilitates seamless integration across the Genio hardware ecosystem.

Scalable, Standard Software

- Standard Linux architecture & interfaces
- Upstream BSP (expert features with confidential IPs)
- Active migration to latest kernel
- Single SDK for the Genio Family SoCs

AI Development Tools

- Software tools and APIs
- Optimized and pre-trained deep learning models
- AI simulator to estimate and optimize performance

Android Support

- 3 Android upgrade with vendor freeze
- 3-year security patch after last upgrade

Linux Support

- 3 Kernel version upgrade
- 3-year security patch after last upgrade
- Mainline kernel

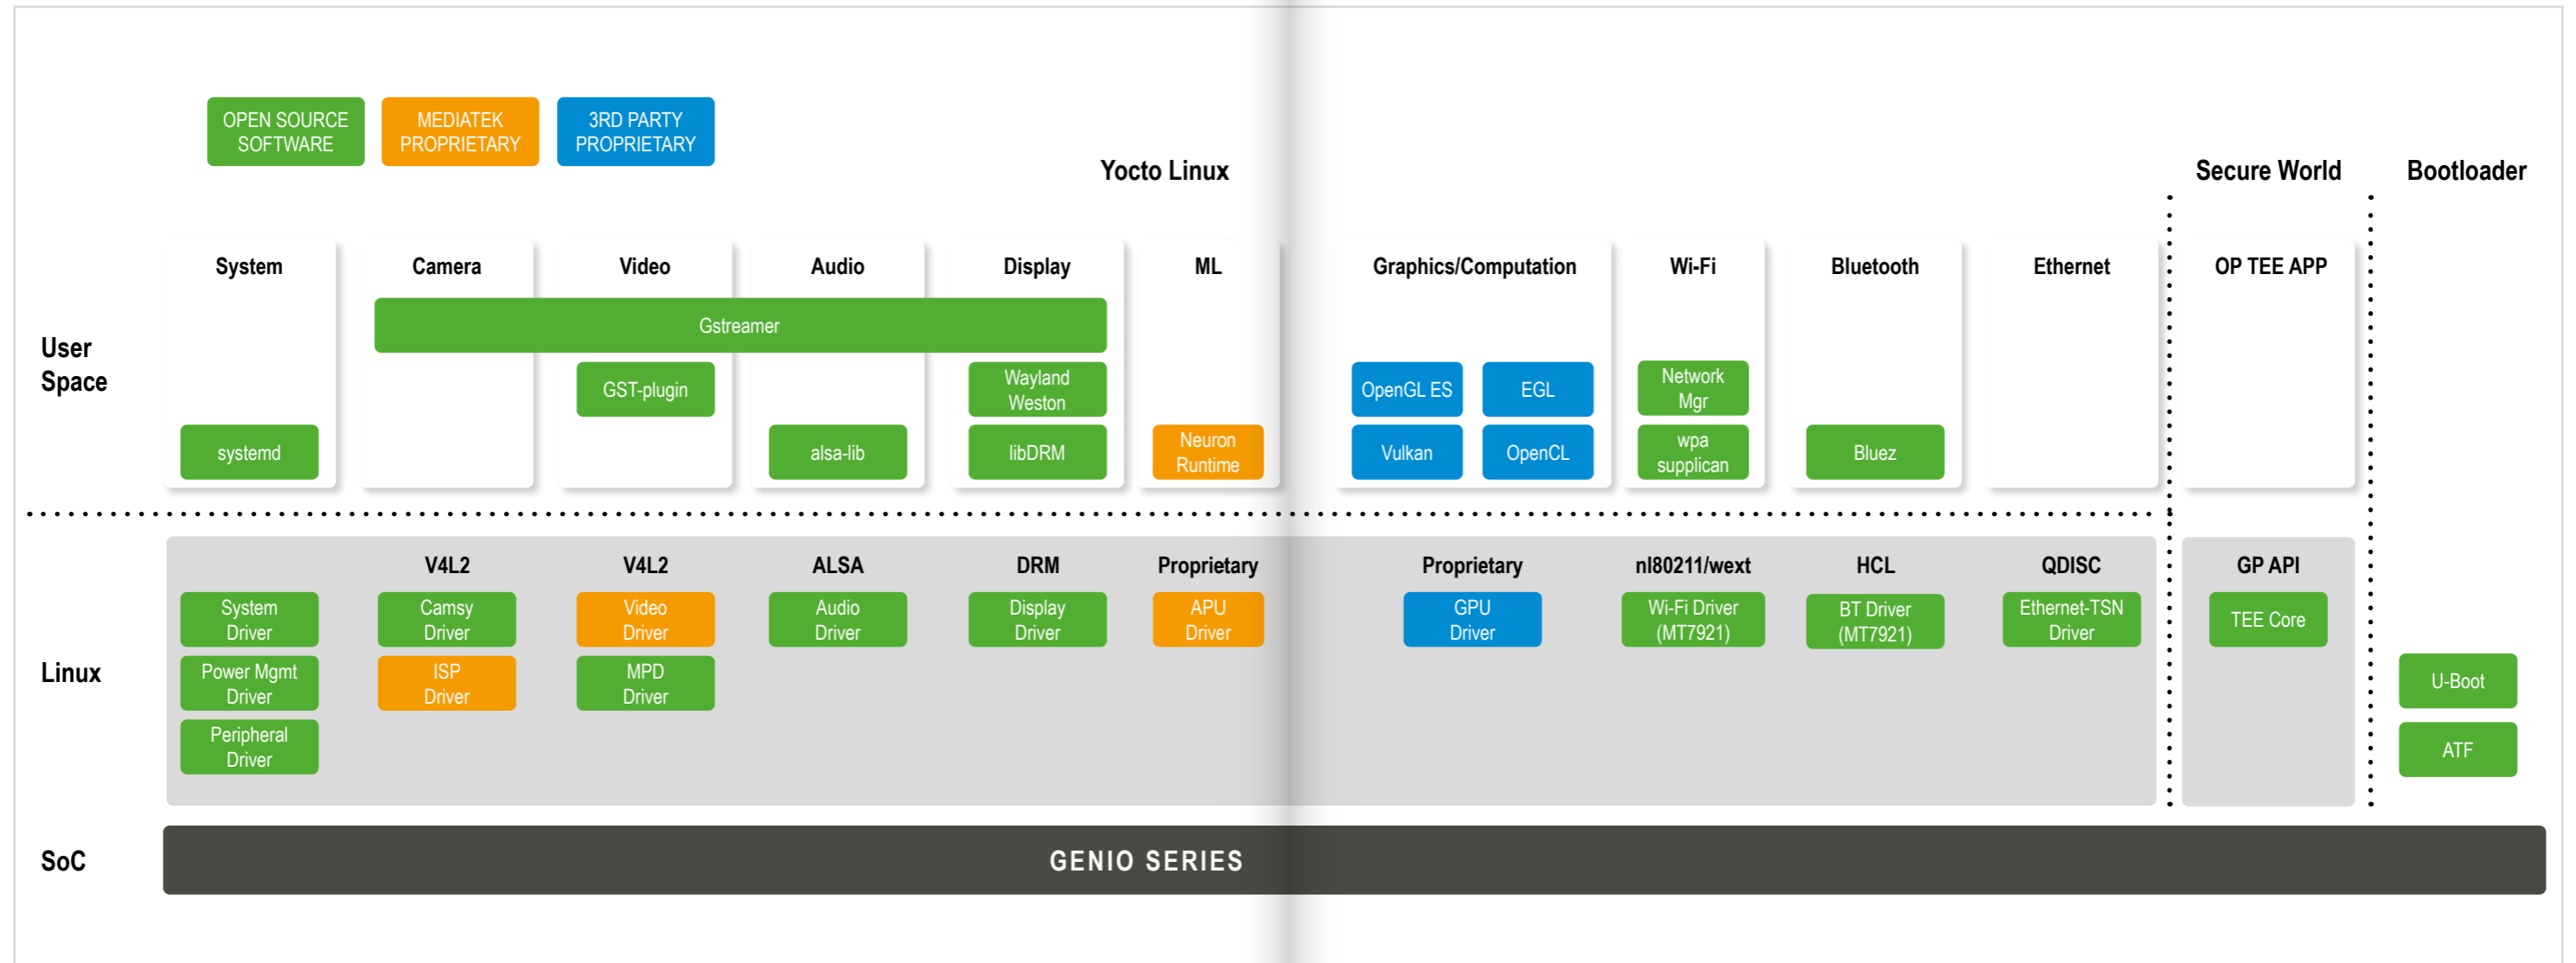

Ubuntu Support

- Lifecycle 10 years
- Follow Canonical's policy

MediaTek's IoT Open Linux, based on Yocto Linux, proves a secure, feature-rich platform for developing IoT applications. Our platform simplifies software and services integration and enables powerful IoT applications built for optimal performance, reliability, and security.

Features

Open and Standard

Based on standard Yocto Linux, all drivers will upstream to mainline, providing an easy to develop environment for users.

AI Accelerator

Integrated MediaTek AI Accelerator – NeuroPilot for a complete APU application in Genio series products and provide a standard TensorFlow lite interface.

Connectivity

Pre-integrated with MediaTek connectivity modules, quickly landing 5G/Wi-Fi 6/Wi-Fi 6E support in your IoT application.

Guides

IoT Yocto Overview

Based on the Yocto project, IoT Yocto provides board support packages (BSP) for IoT evaluation kits and development boards.

Get Started

Easy steps to set up the development environment, build an image, flash the image to the board, and connect it to the board.

IoT Tools

IoT tools are a set of tools to configure and interact with MediaTek Evaluation boards.

*The actual available functions are dependent on the operating systems, please check with your MediaTek contact for details

NeuroPilot: MediaTek's Ecosystem for AI Development

MediaTek's NeuroPilot is an ecosystem of software tools and APIs designed to simplify the development of efficient AI applications on devices powered by MediaTek chipsets, specifically targeting the edge AI space. MediaTek's NeuroPilot technology enables executing AI tasks directly on the device reducing latency, improving security, and facilitating reliable and efficient offline operation.

Support for Popular AI Frameworks

Compatibility with frameworks like TensorFlow Lite, PyTorch, Caffe, and others allows developers to leverage existing models and code

NeuroPilot Model Hub

Set of pre-trained machine learning models ready for fine-tuning and deployable anywhere with AI enabled devices powered by MediaTek

Hardware Acceleration

Utilizes dedicated hardware components, MediaTek AI Processing Unit (APU), within the chipset to accelerate AI computations, improving performance and power efficiency

AI on Board

More powerful chips and development tools will bring AI capabilities to connected devices at the edge, delivering better performance and enhanced features to the Internet of Things.

One Standard Platform, Multiple Applications

MediaTek offers a single platform for the development of industry, commercial and enterprise IoT applications, reducing development costs and enabling faster time to market.

Flexible Fleet Management system

Integrates of many functions such as vehicle surveillance, tasking management, driver management, fleet analysis, and driving safety management.

Mediatek Genio 350 has 4 x ARM Cortex A53, 2.0 GHz with less than 2W power consumption, is especially suitable for high performance applications in a fanless scenario. Genio 350 provides 0.3 TOPS APU, it helps the end user to realize edge AI application easily. For software, Genio 350 supports Android and Yocto Linux. It provides a flexible structure with complete documentation for developers; users can integrate their application and solutions easily and quickly.

AI-based Hand-Held Device

Deploying edge AI applications to power smart handheld devices for POS (point of sale), face recognition, license plate, and object recognition applications

MediaTek Genio 510 has 2 x ARM Cortex A78, 2.0 GHz and 4 x ARM Cortex A55, 2.0 GHz six cores CPU with less than 4W power consumption, especially suitable for advanced and compact handheld devices. The Genio 510 provides over 2.8 tops APU, it help end user to realize edge AI application easily. MediaTek Genio 510 connects with the latest WiFi, Bluetooth and Sub-6 GHz 5G modules based on MediaTek devices for industrial, consumer and enterprise applications, enabling anywhere, anytime connectivity.

New Generation Livestreaming

Streaming media simultaneously recorded and broadcast in real-time over the Internet.

Mediatek Genio 1200 has 4 x ARM Cortex A78, 2.2 GHz and 4 x ARM Cortex A55, 2.0 GHz eight cores CPU with less than 7W power consumption, especially suitable for high performance application in a fanless scenario. The Genio 1200 provides over 4.8 TOPS APU, it help end user to realize edge AI application easily. For video streaming capabilities, Genio 1200 has 4K/90fps decode and 4K/60fps encode. It also supports dual ISP for camera application. The software development kits with Yocto Linux and Ubuntu, provides flexible structure with complete documentations for developers. Users can integrate their application and solution easily and quickly.

MEDIA TEK

About MediaTek

MediaTek Incorporated (TWSE: 2454) is the world's 4th largest global fabless semiconductor company and powers more than 2 billion connected devices a year. We are a market leader in developing innovative systems-on-chip (SoC) for mobile device, home entertainment, connectivity, and IoT products.

Our dedication to innovation has positioned us as a driving market force in several key technology areas, including highly power-efficient mobile technologies, industrial and automotive solutions, and a broad range of advanced multimedia products such as smartphones, tablets, TVs, 5G, Chromebooks, Voice Assistant Devices (VAD) and wearables.
